

Tracheostomy Shower Shield / Neck Stoma Bath Guard / Tracheal Stoma Shower Shield & Shower Protector

The Tracheostomy / Stoma is a new opening (Hole) surgically made at the base of the neck as an alternative airway route to breathe, mostly, after the larynx is fully or partially removed due to throat cancer or some other disastrous disease. The Tracheostomy Shower Shield / Stoma Bath Guard / Tracheal Stoma Shower Shield & Shower Protector is very essential to care properly for the Throat Stoma opening.

The Tracheostomy Shower Shield / Neck Stoma Bath Guard / Tracheal Stoma Shower Shield and Shower Protector is a light weight, hassle free, convenient, comfortable and protective device, developed to help and allow the person to have shower bath, protecting from water to enter the throat stoma hole. However, this is not intended to protect neck stoma opening while swimming or participating in other water activities.

Important features:

- Made from medical grade silicon material.
- Adjustable rear strap with a button closure made of brass to ensure that it does not get rusted with water contact.
